# ROCO TRAINING

Our training programs are all about keeping it real, keeping it safe, and keeping it simple. For more than 40 years, Roco has trained emergency responders from around the globe – from municipal responders to industrial rescue teams to elite military groups. Our techniques are tested, tried, and proven on a daily basis.

From foundational rescue skills to working at height to complex confined space scenarios, you and your team will benefit from our wide variety of course offerings. And, if you don't see what you're looking for here, we can customize a program just for your needs or site-specific requirements.

## TRAINING PROGRAMS INCLUDE:

- **Urban/Industrial Rescue Essentials™**
- **Fast-Track™ Confined Space Rescue Technician**
- **Fast-Track™ Confined Space & Rope Rescue Technician**
- **Compliance Rescue Refresher™**
- **Urban/Industrial Rescue Team Operations™**
- **Team Performance Evaluation (TPE™)**
- **Trench Rescue Technician**
- **Rescue From Fall Protection**
- **Tower Work & Rescue**
- **OSHA Entrant, Attendant & Entry Supervisor (EAS™) Workshop**
- **Tactical & EOD Training**
- **Emergency Medical Responder (EMR)**
- **Combat Technical Rescue™**
- **EOD Rigging and Ordnance Extraction™**
- **Customized Training and More!**

*Programs are available as "open-enrollment" courses or as private, on-site courses. For details and course dates, visit our website.*

## RTC ROCO TRAINING CENTER

Baton Rouge, Louisiana USA

Our Roco Training Center (RTC) is a state-of-the-art training facility built for confined space and technical rope rescue. The 5-story training prop is used to simulate a wide array of complex rescue scenarios and configurations for urban and industrial environments. Rescue disciplines include confined space; high-angle; trench rescue; rescue from fall protection; and tower work and rescue. The Baton Rouge facility is also used for Roco's military and tactical training.

The RTC training prop features all 6 types of confined spaces as referenced in OSHA 1910.46 Permit-Required Confined Space Regulation, which allows emergency response personnel to meet all six minimum rescue practice requirements at one convenient location. It's the perfect choice for your rescue training needs.

# ROCO RESCUE TRAINING PATHS

## Step 1 – Do you need “Rescue Technician” certification for you or your team members?

- Yes** – I want Annual Confined Space Types and two-year Roco certification to “Rescue Technician” based on NFPA 1006. Skills testing and written certification exam is required. → Move to **Path Chart #1**
- No** – I just want Annual Confined Space Types training. Certification with skills testing and written exam is not needed. → Move to **Path Chart #2**

## Step 2 – Do you have one or two people to train, or is it your entire team?

- Small number of individuals → Check out our Open-Enrollment Courses Schedule (Refer to website for current course schedule.)
- Team or larger group → Check out our Privately Scheduled Courses (Your schedule, your location or at Roco Training Center.)

## Step 3 – Sign up or get a quote at [RocoRescue.com](http://RocoRescue.com) or call 800-647-7626 or email [info@rocorescue.com](mailto:info@rocorescue.com).

# ROCO RESCUE CHALLENGE

Roco Rescue Challenge is an annual learning event focused on team-building and rescue efficiency while also meeting the minimum annual Confined Space Types practice requirements of OSHA 1910.146. It features a wide variety of confined space and high angle rescue scenarios designed by Roco's top instructor personnel. So, whether you are a new team, or have been working together for years, Rescue Challenge is a fun event that will greatly enhance your teamwork, communications, and rescue skills. Observers are also welcomed; registration is required.

*For more details about this event, visit our website.*

# PATH CHART #1 — CERTIFICATION (NFPA 1006 RESCUE TECHNICIAN)

OSHA-required CS Types training combined with third-party Roco certification.  
Includes performance testing and written exam.

## Urban/Industrial Rescue Essentials™

Learn essential skills to perform effectively as a member of an urban or industrial rescue team.

🕒 50 📄 None

## Confined Space Rescue Technician

Completes training to NFPA 1006 Confined Space Technician.

🕒 40 📄 Rescue Essentials™ Industrial Rescue I/II™

## FAST-TRACK OPTIONS

Roco Technician certification is valid for two years.

### Fast-Track™ Confined Space Technician

Combines two courses to fast track the student to NFPA 1006 Confined Space Technician Level.

🕒 70 📄 None

### Fast-Track™ CS & Rope Technician

Combines three courses to fast track the student to NFPA 1006 Technician Level for both Confined Space and Rope Rescue.

🕒 110 📄 None

## RECERTIFICATION

Roco Technician certification is valid for two years.

### Confined Space Technician

🕒 30 📄 Roco certification-level course

### CS & Rope Technician

🕒 40 📄 Roco certification-level course

# PATH CHART #2 — NON-CERTIFICATION PROGRAMS

OSHA-required CS Types training without third-party Roco certification.

## Urban/Industrial Rescue Essentials™

Learn essential skills to perform effectively as a member of an urban or industrial rescue team.

🕒 50 📄 None

## Urban/Industrial Team Operations™

Scenario-based training designed to build upon essential skills.

🕒 40 📄 Rescue Essentials™ Industrial Rescue I/II™

## SKILLS MAINTENANCE

### Compliance Rescue Refresher™

Confined space and rope rescue skills maintenance training to demonstrate annual proficiency in representative spaces.

🕒 20 📄 Previous Training Required

### Custom TPE™

Rescue team performance evaluation with written documentation emphasizing team strengths as well as areas for improvement. Practice is included in all six confined space types including rescue from fall protection based on training location.

(This course meets the minimum annual practice requirements of OSHA 1910.146.)

🕒 30 📄 Previous Training Required

## ROCO TACTICAL TRAINING & KITS

Roco's Tactical Division was created more than 20 years ago in response to the challenges faced by the dynamic missions of U.S. Air Force Pararescue (PJs). Our tactical training became a core skillset for the PJs in the years following the terrorist attacks of September 11th. This quickly expanded to include all branches of the U.S. military, select foreign partner military units, and all levels of U.S. law enforcement. Today, America's military Special Operations Forces (SOF) and Law Enforcement (LE) continue to rely on Roco Tactical to provide cutting edge high-angle access and rescue training along with the latest equipment kits designed for mission-specific operations.

Roco's Tactical Division specializes in providing training and equipment solutions for difficult problem sets in tactical environments that span maritime, urban, and mountain settings. Whether rescuing combat casualties from the side of a cliff or extricating unexploded ordnance from the bridge wing of a ship at sea, Roco Rescue Tactical Division has training and equipment solutions proven to ensure mission success.

**“ Roco Tactical is proud to lead the way in developing new and innovative techniques and equipment kits to meet the very specialized needs of the DoD. ”**

Results are expected when teams bring their greatest rope challenges to Roco's Tactical Division – whether it's developing a new specialized technique or creating a new piece of equipment or kit. The Roco Tactical team of instructors applies its extensive rescue and combat experience along with the current, real-world experiences of today's operator to develop highly efficient solutions.

No one can make the jobs of America's brave SOF and LE operators easy, but it's our hope to make them *easier*.

## TRAINING

From our “pre-9/11” Pararescue courses to today’s intense 11-day program known as Combat Technical Rescue®, Roco continues to lead the field with the latest rope techniques for tactical environments. We offer many course options as well as customized programs based on mission specifics.

### Tactical Course Options Include:

- **EOD Rigging and Ordnance Extrication™**
- **Combat Technical Rescue®**
  - Confined Space Rescue
  - Structural Collapse Rescue
  - Military Vehicle Extrication
- **Specialized Rope Access**
- **Advanced Urban Ropes™**
- **Tactical Container Access™**
- **Mountain Operations**
- **Customized & Modular Training**

## EQUIPMENT KITS

Portable and lightweight, Roco Tactical Equipment Kits are built for small team operations in the most demanding environments possible. Equipment selected for Roco kits meets or exceeds rigorous safety standards and is tested for operational effectiveness and suitability before it receives our stamp of approval.

Contact one of our tactical team members for more information on specialized gear and equipment kits.

## ROCO RESCUE STANDBY SERVICES

While our mission is always focused on prevention, Roco CSRT Rescue Standby team members are trained and experienced emergency responders ready to take immediate action should the need arise. This is accomplished by rigorous training, safety/rescue preplanning, and rescue-certified personnel.

“ OSHA’s Permit-Required Confined Space Standard (1910.146) and Confined Space Construction Standard (Subpart AA) require employers to provide rescue capabilities when employees must enter confined spaces. ”

### CSRT RESCUE STANDBY

- Confined Space
- High Angle
- Fall Protection
- Rope Access
- Marine/Dockside/Rescue Boats

Roco Rescue Boats are available for marine/dockside rescue standby in accordance with OSHA 1026.106(d).

## CREDENTIALS

- Certified, trained and equipped Confined Space Rescue Technicians (NFPA 1006)

## ROCO SAFETY & HEALTH SERVICES

Roco is proud to announce its newest service division – Roco Safety & Health. Our highly trained and experienced safety personnel have teamed up with our EMTs and Paramedics to provide the ultimate protection for your workforce. This dual-role approach offers proactive safety planning and hazard prevention along with immediate emergency response to manage and mitigate incidents on scene. Roco's innovative strategy will enhance your workplace safety culture, while bridging the gap between preventive measures and critical care. Make Roco Safety & Health a trusted partner as you create a safer and healthier work environment.

Roco Safety & Health Specialists are also passionate educators. Having emergency response backgrounds and real-world experience make our training teams the perfect fit for relaying lifesaving skills and knowledge to your workforce.

Training topics include Confined Space Competent Person (Entrant, Attendant & Entry Supervisor); Fall Protection Competent Person; Trench/Excavation Competent Person; CPR & First Aid; Emergency Medical Responder (EMR); and many other safety and health-related training programs.

### CREDENTIALS

- **CSP – Certified Safety Professionals**
- **ASP – Associate Safety Professionals**
- **COSS – Certified Occupational Safety Specialists**
- **Paramedic**
- **EMT – Emergency Medical Technician**

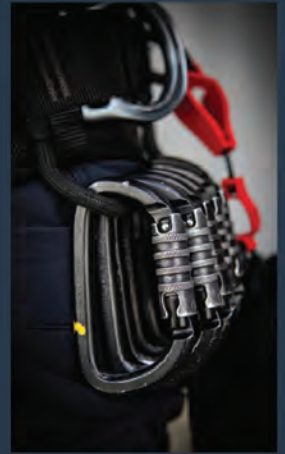

Consult with one of our Safety & Health Specialists to determine how we can best meet your needs and expectations.
