ROCO TRAINING

For more than 40 years, Roco has trained emergency response personnel from around the globe – from municipal responders to industrial rescue teams to elite military groups. Our confined space and rope rescue techniques, services, and equipment are tried, tested, and proven on a daily basis. We are proud to offer a wide variety of courses as shown below. However, if you don't see what you are looking for, let us develop a customized program just for you.

COURSES INCLUDE:

- Rescue Essentials™
- FAST-TRACK 70™ Confined Space Rescue Technician
- FAST-TRACK 110™ Rope & Confined Space Rescue Technician
- Compliance Rescue Refresher™
- Rescue From Scaffolding
- Rescue From Fall Protection
- Advanced Team Operations™
- Trench Rescue
- Tower Work & Rescue
- Team Performance Evaluations (TPE™)
- Confined Space Rescue Technician Certification
- Rope Rescue Technician Certification
- Combat Technical Rescue®
- EOD Rigging and Ordnance Extraction™
- Emergency Medical Responder (EMR)
- Fall Protection Competent Person
- Confined Space Entrant, Attendant & Supervisor (EAS™)
- First Aid/CPR
- Custom Programs & More!

“ Our training programs are all about keeping it real, keeping it safe, and keeping it simple. ”

Programs are available as “open-enrollment” courses or as private, on-site courses. For details and course dates, visit our website.

RTC ROCO TRAINING CENTER

Baton Rouge, Louisiana USA

PETZL

technical
partner

Roco Training Center (RTC) is a state-of-the-art facility that was designed and built for confined space and technical rope rescue. The 5-story prop is used to simulate a wide array of complex rescue scenarios and configurations for urban and industrial environments. The prop features all six confined space types as referenced in OSHA 1910.46 Permit-Required Confined Space Regulation, which allows emergency response personnel to meet minimum annual rescue practice requirements at one convenient location. Rescue disciplines taught at RTC include confined space, high-angle, trench rescue, rescue from fall protection, and tower work and rescue. Other specialized training for military and tactical operations is also conducted at the RTC. A “scaffolding prop” was recently added to be used for rescue from scaffolding and rescue from fall protection. Whatever your rescue training needs, RTC is the perfect choice.

ROCO RESCUE CHALLENGE™

Roco Rescue Challenge is an annual event focused on learning, team building, and operational efficiency. It meets the minimum annual practice requirements of OSHA 1910.146 Permit-Required Confined Spaces in all six representative confined space types.

Whether your rescue team is fairly new or has been working together for years, Rescue Challenge provides an excellent opportunity to gain realistic experience in real-world rescue simulations. Observers are welcomed; advanced registration is required.

For more details about this event, visit our website.

CERTIFICATION & NON-CERTIFICATION

Certification by an independent third party to a national consensus standard (NFPA 1006) is an excellent way to document the individual proficiency of your team members as required by OSHA 1910.146 Permit Required Confined Space regulation. It is also a great way to establish a baseline of skills for your rescue team. Written exam and performance-based testing provides added intensity to this program, which often results in a more skilled rescuer.

All Roco training programs are designed to produce proficient rescuers. However, if certification testing is not required, we also offer non-certification programs (refer to Path Chart on next page). These programs meet the annual minimum practice requirements of OSHA 1910.146 based on the various confined space types to which your team may respond. For training conducted at the Roco Training Center, all six confined space types are incorporated into rescue practice. So, whether you need certification or not, we've got you covered. Scan the codes below for more details!

Rescue Essentials™

FAST-TRACK™ 70

FAST-TRACK™ 110

ROCO TRAINING PATH CHART

CERTIFICATION

Roco Rescue Technician certification exam and performance skills testing. Certification is valid for two years. Includes OSHA-required Confined Space Types Training (1910.146).

NON-CERTIFICATION

Does NOT include Roco Rescue Technician certification exam and skills testing. Includes OSHA-required Confined Space Types Training (1910.146).

FAST-TRACK™ 70

Confined Space Rescue Technician Certification

Combines two courses to “fast-track” the student to NFPA 1006 Confined Space Rescue Technician.

70 Hrs

Prerequisite: None

Rescue Essentials™

Learn essential high angle and confined space rescue skills to perform effectively in an urban or industrial rescue team.

50 Hrs

Prerequisite: None

FAST-TRACK™ 110

Rope and Confined Space Rescue Technician Certification

Combines three courses to “fast-track” the student to both NFPA 1006 Rope & Confined Space Rescue Technician.

110 Hrs

Prerequisite: None

Confined Space Rescue Technician

Completes training and certification testing to NFPA 1006 Confined Space Rescue Technician.

40 Hrs

Prerequisite: Rescue Essentials™

Rope Rescue Technician

Completes training and certification testing to NFPA 1006 Rope Rescue Technician.

40 Hrs

Prerequisite: Rescue Essentials™

Recertification

Roco recertification testing required every two years.

30 - 40 Hrs

Prerequisite: Certification

Rescue Essentials™

Learn essential high angle and confined space rescue skills to perform effectively in an urban or industrial rescue team.

50 Hrs

Prerequisite: None

Team Performance Evaluation (TPE™)

Scenario-based team performance evaluations with documented capabilities report. Includes OSHA-required Confined Space Types Training and customizable evaluations.

20 Hrs

Previous Training Required

Advanced Rescue Team Operations™

Scenario-based training designed to build upon essential skills. Meets OSHA minimum annual Confined Space Types practice.

40 Hrs

Prerequisite: Rescue Essentials™

Roco Rescue Challenge™

Teams from across the nation converge on the Roco Training Center in Baton Rouge, Louisiana, to participate in two rigorous days of real-world rescue scenarios. Includes OSHA-required Confined Space Types Training. Written capabilities report is provided.

20 Hrs

Previous Training Required

Compliance Rescue Refresher™

Confined space and rope rescue skills maintenance training to demonstrate annual proficiency in representative spaces.

20 Hrs

Previous Training Required

ROCO TACTICAL TRAINING & KITS

Roco's tactical division specializes in providing mission-specific training and equipment solutions for difficult problem sets. This includes the most challenging environments such as maritime, urban, and mountain settings. Whether rescuing combat casualties from the side of a cliff or extricating unexploded ordnance from the bridge wing of a ship at sea, we have the training and equipment solutions proven to ensure mission success.

“Roco is proud to lead the way in developing innovative techniques and equipment kits to meet the very demanding needs of DoD special operators and other law enforcement personnel.”

EXPECTED RESULTS

When tactical teams bring their greatest rope challenges to Roco – they expect results. Our tactical instructors apply their extensive rescue and combat experience to meet these specialized needs with real-world, highly efficient solutions. Give us a call, we'll be glad to talk.

FOCUSED TRAINING

For more than 20 years, Roco has led the field with the latest rope techniques and kit for tactical environments. From our original course in 2001 for USAF Pararescue to our intense 11-day program today known as Combat Technical Rescue®, we are proud to have worked with the best. We offer a variety of training options as well as customized programs built specifically for the top tactical teams in the world.

TACTICAL OPTIONS:

- EOD Rigging and Ordnance Extraction™
- Combat Technical Rescue®
 - Confined Space Rescue
 - Structural Collapse Rescue
 - Military Vehicle Extrication
- Specialized Rope Access
- Advanced Urban Ropes™
- Tactical Container Access™
- Mountain Operations
- Customized Programs

EQUIPMENT KITS

Portable and lightweight, Roco Tactical Equipment Kits are built for small team operations in the most demanding environments. Equipment selected for Roco kits meets or exceeds rigorous safety standards and is tested for operational effectiveness and suitability before it receives our stamp of approval.

Bring us your rope challenges, and our tactical team will design training and kits to meet your needs.

ROCO RESCUE STANDBY (CSRT)

Prevention is always top priority for Roco CSRT Rescue Teams. Our trained and equipped emergency response personnel will add an extra measure of safety and efficiency to your confined space entry operations. However, should the need arise, Roco CSRT will be ready to take immediate action. Roco CSRT members are certified Confined Space Rescue Technicians and have been tested to meet the skills requirement of NFPA 1006.

“ OSHA regulations require employers to provide timely and capable rescue response when employees must enter permit-required confined spaces. ”

- OSHA 1910.146 PRCS
- OSHA 1926 Subpart AA

CSRT RESCUE STANDBY

- Confined Space
- High Angle
- Fall Protection
- Rope Access
- Marine/Dockside/Rescue Boats

Roco Rescue Boats are available for marine/dockside rescue standby in accordance with OSHA 1926.106(d).

CREDENTIALS

- Roco Certified Confined Space Rescue Technicians (NFPA 1006)
- Trained & Equipped Emergency Responders
- Medically Trained EMRs, EMTs, & Paramedics
- NFPA 1983 Rescue Equipment
- OSHA Qualifications for Entrant, Attendant & Entry Rescue
- COSS (Certified Occupational Safety Specialist)
- NANTeL (National Academy for Nuclear Training)
- Avetta/ISNetworld® Compliant
- OSHA VPP Star Worksite
- ISO 9001 Certified
- WBENC & SBA Nationally Certified Woman-Owned Small Business

TM

ROCO SAFETY & HEALTH SERVICES

Roco safety and health personnel will provide added protection for your employees while maintaining a safe and productive worksite. Many of our team members are “cross trained” in safety, medical, fall protection, and rescue operations. Others are professional educators who can offer a variety of safety and medical topics while on site.

“ Roco personnel combine proactive safety with real-world emergency readiness, offering both prevention and protection for your worksite. ”

CREDENTIALS

- Certified Safety Professionals (CSP)
- Associate Safety Professionals (ASP)
- Certified Occupational Safety Specialists (COSS)
- EMT's & Paramedics

WORKSHOPS

- Entrant, Attendant, Entry Supervisor & Retrieval (EAS-R™)
- Fall Protection Competent Person
- Emergency Medical Responder (EMR)
- CPR & First Aid

Consult with one of our Safety & Health Specialists to determine how we can best meet your needs.

ROCO EQUIPMENT

Roco equipment is tried and proven by our talented instructors and rescue standby personnel who use this gear on a daily basis. It is thoroughly vetted before we recommend it.

EQUIPMENT

We are proud to offer quality gear that is proven to perform in the most rugged environments.

- Beal-PMI
- Black Diamond
- BlueWater
- CAMP
- CMC
- Courant
- DBI-SALA
- Gibbs
- Harken
- MadRock
- PMI
- Rock Exotica
- Roco
- Skedco
- SMC
- Sterling
- Yates
